It is altogether likely, knowwer, that the cabinet will decide on a Becember session of the legislature to deal with the problem of enacting a law to regulate government control and sale of liquors as asked for by the electors Monday. This was indicated by many of the private U.F.A. seembers of the house in anofficial statements during the fact two weeks. It was apparently realized that enforcement of the present prohibition law could not be succensfully carried on for any considerable length of time if the system of government control was cudered by the province.

Saverday it is a pretty safe bet that the View will heat Regins Saturday it is a pretty safe bet that the Vice will heat Regina as predicted by their essek Fred Ritter.

In the sust the same is a little more clouded. Queen's bus won the intercollegists title already, and on form ought to again win the Canadian championship. The Presbyterians have not lost a game thus for this acason, nor have they been tivil a record ant equalled by any other senior team in the country. The O.R.F.U. representative for Descelon honors, probably Parkdale again, can be discrimed as a possible finally. The eastera representative will be either Queen's or Hamilton and most likely Queen's. The western town will probably he Winnipeg. Winnipeg can hardly hope to defeat a well night perfect machine such as "Pep" Leadley and Harry Butmone have built up so the chances are all in favor of the Dunation title remaining where it is at present i.e. at Queen's.

At the time of writing it looks like a load alide for elemen "D", with only the discensions of the phenomenon to by determined by subsequent returns. From the Brst reports the lease was not in doubt, and with a quarter of the polis. bened from it seems certain that the last chaice on the ballot was the first with the voters, by a majority certain to be large, likely to be overwhelming, and possibly beyond precedent at a plobinetts on the liquor question in Canada.

As the ballet was arranged, prohibition was beaten unless it seezed fifty-one per sent of the first choices. That any large percentage of those who wanted liquor of some or all kinds sold as a bevorage would make prohibition their mound choice, was a possibility so remote as to be nonexistent. The logical renclusion was that those who preferred B, C or D would prefer all of them to A, and that A must get something more than half the total first aboves to win. The first choices evidently went to D, in such preportion that the mound, third and fourth shains de not count.

The result is a clear and absolute reversal of the verdict given by the veters eight years ago. Then they called for the prohibition of the mic of intexicants for herotage purposes, and on cock occasion alone have sanctioned the tightening up of the law, Provincial and Federal, with a Silecton, at the very first time the policy is attacked his head the members of the government with me enception.
